

QUALITY POLICY

Semefab will ensure that its quality management system (QMS) meets the requirements of BS EN ISO 9001:2008.

We are currently in the process of transitioning to the new ISO 9001:2015 standard which we expect to have accreditation for in early 2018.

Semefab, as one of the leading suppliers to the electronics sector, aims to be at the forefront of product development and commits to making continual improvements in the quality management system, our operational effectiveness and our financial performance.

Through understanding the needs and expectations of our customers we aim to deliver total customer satisfaction; furthermore, we also plan to address wider requirements of other interested parties and stakeholders as necessary.

To help drive continual improvement in the business we will set out clear and deliverable quality objectives. We shall monitor progress against these to ensure that our aim of continual improvement is being delivered.

Key to meeting our objectives are staff. Semefab recognises that people are our most important resource and we are committed to investing in our personnel to ensure we maximise their contribution to the business.

We work closely with our suppliers and other partners and will engage with these to ensure the aims of this policy are delivered.

The Semefab Quality Policy is fundamental in guiding the organisation towards our key aims of improvement, product development and business improvement. These commitments will be communicated to all staff and other interested parties by this policy statement.
